01. INTRODUCTION

01. INTRO

The rise of cryptocurrencies has witnessed a remarkable transformation in the financial ecosystem, captivating both retail and institutional investors alike. However, the early adoption of certain tokens and their subsequent price surges have left many new entrants feeling like they missed the boat.

This has ignited a movement within the crypto developer community to create tokens that offer a chance for the little retail and it's years gone by to level the playing field for new participants in the crypto economy.

The creators behind XRP20 have recognized the need to address this. XRP20 stands as the second coming of XRP, building upon the foundations of its predecessor while ushering in a new era of accessibility, inclusivity, utility, and simplicity.

The Need for Second Chances:

The initial emergence of cryptocurrencies was characterized by groundbreaking innovations, but it was often restricted to tech-savvy early adopters who possessed the knowledge and resources to delve into the ever-evolving market. A knowledge gap emerged, creating barriers for potential participants seeking a fair opportunity to engage with digital assets.

XRP20, a brainchild of community-driven ideals, aims to bridge this gap and extend a helping hand to those seeking a second chance at exploring the vast potential of cryptocurrencies. By leveraging the power of the Binance Smart Chain, XRP20 strives to democratize access to a token that has traditionally served institutional investors and those who were already in the XRP community - also known as the XRP army.

Easier, Seamless, and More Secure:

Building upon the rich heritage of XRP, XRP20 has been methodically crafted with enhanced usability and user-friendliness in mind. Our team of dedicated experts, comprising blockchain enthusiasts and specialized developers, has worked tirelessly to streamline the user experience.

XRP20 boasts a seamless onboarding process, making it easier for both novices and experienced crypto veterans to purchase, trade, and securely HODL or stake their tokens. Our goal is to minimize barriers to entry and maximize the ease of use, thereby unlocking the full potential of the ecosystem.

Moreover, XRP20 takes security very seriously. We've implemented robust measures to safeguard our community's assets.

Embracing Community-Driven Development:

At the heart of XRP20 lies a thriving community that actively supports the original company's vision and ethos. The XRP Army, known for its unwavering loyalty and support, has firmly believe in the power of decentralization and that creating a new token for the XRP Army will strengthen the ecosystem and enable the community's resolve in the wake of its current challenges.

02. ROADMAP

02. ROADMAP

Presale and Token Distribution

Our first focus is to raise awareness about XRP20 and our mission to offer a second chance to new entrants in the XRP ecosystem. We aim to attract a diverse range of supporters and contributors through a fair and transparent presale event. The presale will be an opportunity to establish a strong and engaged community around XRP20.

Pre-Launch Marketing and Awareness

During the presale phase we will initiate a marketing strategy that highlights the accessibility and ease of acquiring XRP20, emphasizing its value proposition as a chance for even the token-curious and stale trader's to earn passive income.

Launch and Burn Activation

After a successful launch on PCS, one of our core initiatives is the implementation of a token burning mechanism. XRP20 is set up as a deflationary token, meaning that a portion of each transaction will be burned, or destroyed, over time. This will help to reduce the token supply and, in turn, increase its scarcity.

Post-Launch Community Staking

XRP20 introduces on-chain staking for the XRP Army where anybody can stake their tokens to earn passive income. This is a way for long-term supporters to be actively engages with XRP20, driving its growth. Staking becomes a focus area in this phase as we aim to foster sustained interest and reward the community for holding as supply and providing long-term stability to the staking ecosystem.

03. TOKENOMICS

03. TOKENOMICS

We're implementing similar tokenomics to the original XRP but giving everybody the chance to purchase XRP20 at a super low price and stake their tokens to earn passive income.

Total Supply: 100,000,000,000 Tokens

At the heart of the XRP20 ecosystem lies a carefully crafted tokenomics model that aims to create value, foster community engagement, and ensure a sustainable and thriving ecosystem. With a total supply of 100,000,000,000 tokens, we've set the foundations for a transparent and inclusive digital asset.

Token Allocation:

Public Presale: 40% (40,000,000,000 Tokens)

The public presale phase plays a pivotal role in the launch and growth of our ecosystem. Allocating 40% of the tokens, 40,000,000,000 tokens will be available for any contributors who share our vision for the future of XRP20. This allocation is designed to reward the committed network of stakeholders supporting the project's mission.

Binance: 40% (40,000,000,000 Tokens)

We believe that active community support is the bedrock for any long-term success of the XRP20 ecosystem. To encourage engagement, 40,000,000,000 tokens will be dedicated to staking rewards. By doing so, the token community members can contribute to the network's stability while earning rewards for their involvement.

Burn Allocation: 10% (10,000,000,000 Tokens)

To enhance token scarcity and promote value appreciation, 10,000,000,000 tokens will be permanently removed from circulation through a burn mechanism. This deflationary approach demonstrates our commitment to creating a sustainable token with increasing investment value over time.

DEX Liquidity: 10% (10,000,000,000 Tokens)

A robust liquidity pool is vital for a smooth and efficient trading experience. We've allocated 10% of the tokens to enhancement for our community. 10,000,000,000 tokens will be available for the first DEX liquidity pool. These tokens will be paired with BNB to ensure that the market is easier for participants to buy and sell XRP20 tokens.
