Welcome to ZeroLend

Copy

A comprehensive guide to our multi-chain, non-custodial lending platform, detailed token utilities, and innovative features.

ZeroLend is a leading lending market specializing in Layer 2 (L2) solutions, Liquid Restaking Tokens (LRTs), Real World Assets (RWAs), BTCFi, and memecoins. The platform’s security is audited and safeguarded by Chaos Labs, Zokyo, Halborn, PeckShield, Sherlock, ImmuneFi, Cantina, Hypernative, and Hexagate

CRYP2NOVA

The ZeroLend Ecosystem

The core products and features within the ecosystem:

1. **DeFi Lending (Live):** A decentralized, non-custodial liquidity protocol enabling users to participate as liquidity providers and borrowers. This forms the basis of the ecosystem, assisting capital formation, leverage, and over-collateralized lending activities in general.

2. **ZeroLend Governance ($ZERO)**: A governance system for governing the ZeroLend Protocol, enabled by the $ZERO token. To learn more, read "Zeronomics"
3. **Liquid Restaking Token Lending (Live)**: Users can deposit LRTs like EtherFi, Puffer, Renzo, and Kelp and take loans in stablecoins/ETH. To know more, read "LRT Lending"
4. **Real World Asset Lending (Live)**: Users can deposit RWAs and take over collateralized loans in the form of stablecoins or ETH. To know more, read "RWA Lending"

If you still have any questions or issues, contact the ZeroLend team through Discord ↗.
