What is Zeuz?

Zeuz is a decentralized trading platform leveraging the Reya Network to provide users with a *seamless* and *efficient* trading experience for synthetic assets - specifically perpetual futures.

Zeuz is a non-custodial platform, with users having full control over their assets.

Front end

Zeuz's front end is designed with an emphasis on intuitiveness and user-friendliness, catering to traders of all experience levels.

Key Features:

• A streamlined interface for seamless navigation across markets.

• Real-time price data display and portfolio management.

• Advanced charting tools and multiple order types for flexibility.

• Built-in analytics to empower traders with informed decision-making.

Whether you're a beginner or a seasoned trader, the front end ensures an effortless trading experience.

Back end

The back end of **Zeuz** is powered by the Reya Network, delivering robust performance, security, and scalability.

Core Capabilities:

• Handles order matching, trade execution, and settlement via Reya's Derivatives Clearing Protocol for a trustless, non-custodial trading environment.

• Integrates with Reya's Liquidity Layer to maintain deep liquidity and efficient price discovery.

• Processes 30,000 transactions per second (TPS) with 100ms block times, ensuring ultra-fast and reliable operations.

Enhanced Trading Features:

• **Low Latency**: Ensures smooth and quick trading experiences.

• **High Throughput**: Supports large trading volumes efficiently.

• **Cross-Collateral for Margin**: Allows capital optimization across assets.

• **Cross-Margin Trading**: Balances profits and losses across positions for maximum capital efficiency.

By leveraging the advanced infrastructure of the Reya Network, Zeuz provides a high-performance, secure, and scalable trading environment tailored to modern decentralized finance needs.

As of today (2025-05-14), **Zeuz** supports over 60 different markets
