Archived copy · cryp2nova.com

Data is the modern oil of our time. Your information and security are crucial. Which is why zKML was launched

ZKML PRIORITIZES USER PRIVACY AND SECURITY.

We are dedicated to creating a future where data ownership is a right and privacy is embedded by design for everyone, everywhere.

Cross-Chain Privacy

Ensuring confidentiality and discretion.

Encrypted Chat

Secure communication.

Dynamic Asset Swaps

Efficient cross-chain transactions.

Decentralised marketplace

Secure and private Models/Dataset marketplace

zKSearch

Private browsing.

ZEBRA

Zebra is a secure messaging platform built on top of the Anon Network. It acts as a secure tunnel for your day-to-day conversations, private discussions, and more.

Use Cases

• Encryption : Ensures that all messages are encrypted on server side

Archived copy · cryp2nova.com

• Anonymity: Utilizes the Anon Network to maintain user anonymity, masking your identity and communication patterns

• User-Friendly Interface: Easy to navigate and use, making secure communication accessible to everyone.

• Cross-Platform Compatibility: Available on multiple platforms, ensuring you can stay connected securely on any device

ZKSEARCH

ZkSearch is a private browser with ai-resume and built-in VPN solutions allowing you to safely browse internet without compromising your data.

Use Cases

• Private Browsing: Your IP is hidden by our server and further anonymized via Anon traffic routing. No history is stored and our ads are untargeted.

• Built-in VPN: Seamlessly access restricted websites without configuration.

Archived copy · cryp2nova.com

• .anon Access: Instantly browse .anon domains without setting up a proxy, just like TOR for .onion sites.

• Private AI Search: Powered by Venice.ai, ensuring encrypted queries and results, protecting against surveillance and profiling.

zKML Ecosystem

zKSearch

Private browser powered by AI models that do not store user data, have Built-in VPN and

Ai Marketplace

Purchase and sell datasets/ LLM models (such as Llama 3, Orca, Chat GLM, etc.) directly using cryptocurrency

Zwap

Privacy tools ensuring confidentiality and discretion, get a fresh funded wallet without letting any trace of hop - 1

Zebra

Archived copy · cryp2nova.com

Privacy-focused encrypted messaging app built on the Anon Network

Lenz

Analyze and give compliance opinions on any web3 product/project based on actual crypto laws.

Anon tracker

A telegram bot allowing you to track your $Anyone airdrop rewards, your relays informations, but also giving metrics and informations about the anon network itself

Our

Roadmap

Phase 1

- Establishment of privacy-focused infrastructure XRPL (ZkShield we put it down for legal reasons)
- Privacy Router: Development of a privacy router for anonymous transactions
- zSnarky Integration: Incorporation of zero-knowledge proofs (renamed to Zwap)
- zKOS: Development of a secure operating system framework

Phase 2

- Collaborate with privacy-focused search engines for shared insights (ZkSearch)
- Leverage Bittensor for powering the zkSearch AI search engine, focusing on the ZKML subnet on Bittensor to ensure enhanced privacy and security (ZkSearch)
- Adapt the zKOS framework for mobile devices ensuring compatibility with major mobile hardware
- Engage with communities around LineageOS and GrapheneOS for insights on privacy-centric mobile OS development

Phase 3

- Enhance interoperability with ROSE and MINA networks, establish partnerships for cross-chain transactions (Zwap)

Archived copy · cryp2nova.com

Phase 4

- Position zKML as a leader in confidential transactions through strategic partnerships, developer collaborations, and educational campaigns (Partnership with $Anyone, $CSwap, $AiGpu)
- Build privacy solutions on both networks, drawing inspiration from projects like Minamix and TornadoMina showcased at ETHGlobal (Zwap is on Oasis)

Phase 5

- Build an AI marketplace allowing users to buy/sell (with crypto) LLM and dataset without storing anything, as well as training their own datasets (AiMarketplace)
- Route ZkSearch queries through the anon network and add a better AI alternatives into it
- Include blockchain integration into Zebra, maybe account abstraction will be native in the future
- Expand Zwap to others EVM chains, Solana, Cosmos etc.
- Make further research about a possible zkOS (looking at AlephZero EVM zkOS)

Meet our leadership

At the forefront of innovation, our team is dedicated to ensuring that your privacy remains protected. Meet the leaders who are pioneering secure and private solutions for the digital age.
